PROFESSIONAL SUMMARY

Web developer with professional experience as a PHP Developer at CRB Innovative Solutions and a Python and Django background built through a Python Full Stack Development certification and personal projects. Experienced in frontend development with HTML5, CSS3, JavaScript, and Bootstrap, backend functionality, admin panels, CRUD operations, and MySQL and SQLite databases. Projects include a Django web application, a Python and MySQL desktop application, and a computer vision project using OpenCV and MediaPipe.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, SQL
Backend Development: Django, PHP, RESTful APIs, CRUD Operations, Authentication
Frontend Development: HTML5, CSS3, Bootstrap, Responsive Web Design, Flexbox, Media Queries
Databases: MySQL, SQLite
Tools and Platforms: Git, GitHub, Figma, Tkinter, OpenCV, MediaPipe
Additional Skills: UI/UX Design, Data Analysis, Cybersecurity Basics, AI and Machine Learning Basics

PROFESSIONAL EXPERIENCE

PHP Developer May 2026 – Present
CRB Innovative Solutions Pvt Ltd

- Contribute to the development and maintenance of **7 client websites** using PHP, MySQL, HTML5, CSS3, and JavaScript.
- Implement frontend interfaces and backend functionality based on client requirements and website specifications.
- Integrate PHP backend logic with MySQL databases to support data storage, retrieval, updates, and deletion.
- Configure and enhance admin-panel functionality for website content management, including CRUD operations.
- Customize existing website components and deliver frontend and backend modifications to meet changing client requirements.

Key Client Projects

- **Apollo Hospital Website:** Implement frontend and backend functionality and establish an administrative panel supporting CRUD operations for website content management.
- **Jaya News and JayaTV Websites:** Create separate frontend interfaces for both websites and integrate them with a shared admin panel for centralized content management.
- **Appaswamy Bone Settings Website:** Enhance the existing frontend and modify backend components to accommodate client requirements.
- **MSS Transport Website:** Apply requested frontend updates and refine existing website components.
- **RS Graphics Website:** Develop page layouts and implement frontend elements using HTML, CSS, and JavaScript.
- **Guardian Security Chennai Website:** Implement and modify frontend interface components to meet website requirements.

Mobile Application Developer Intern - Certification Jun 2024 – Aug 2024
Wizinoa

- Created cross-platform mobile applications for Android and iOS using Dart and Flutter.
- Implemented responsive mobile interfaces using Flutter widgets to support consistent user experiences across devices.
- Integrated RESTful APIs to exchange application data and support dynamic content.
- Translated Figma designs into functional application screens in collaboration with designers.

Technology Job Simulation Intern (Virtual Simulation) - Certification Jan 2024 – Feb 2024
Deloitte

- Completed practical simulation tasks involving coding, data analysis, and cybersecurity concepts.
- Developed a data-unification algorithm to consolidate information from multiple data sources.
- Examined log data to identify potential security issues and suspicious activity.
- Prepared a data-visualization dashboard to communicate findings for client reporting.

Front-End Developer Intern - Certification Jun 2023 – Jul 2023
WebGapp

- Crafted responsive web interfaces using HTML5, CSS3, and Bootstrap for cross-device compatibility.
- Integrated PHP scripts to generate dynamic webpage content and process form submissions.
- Applied responsive layout techniques to improve page presentation across desktop and mobile screen sizes.
- Collaborated on frontend implementation and website updates based on project requirements.

PROJECTS

Job Portal Web Application Personal Project
Python, Django, HTML, CSS, Bootstrap, JavaScript, MySQL, SQLite

- Developed a Django-based web application featuring user registration, login authentication, and URL routing.
- Implemented user authentication workflows and worked through routing errors and database migration issues during development.
- Integrated the application with relational databases using MySQL and SQLi

Hospital Management System Personal Project
Python, Tkinter, MySQL

- Engineered a Python desktop application to manage patient records, doctor information, and appointment details.
- Implemented Create, Read, Update, and Delete (CRUD) operations with MySQL database connectivity through a Tkinter interface.
- Incorporated login authentication to provide a login-controlled entry point to the application.

Virtual Mouse Using Hand Gesture Recognition Personal Project
Python, MediaPipe, OpenCV

- Created a webcam-based virtual mouse that translates hand gestures into cursor movement, left-click, and right-click actions.
- Applied MediaPipe hand-landmark detection and OpenCV video processing to recognize gestures in real time.
- Refined detection confidence thresholds, landmark-distance calculations, and cursor smoothing to distinguish gestures and reduce cursor jitter.

Personal Portfolio Website Personal Project
HTML5, CSS3, JavaScript

- Designed and implemented a responsive portfolio website using HTML5, CSS3, Flexbox, and media queries.
- Developed website navigation and client-side form validation using JavaScript.
- Adapted page layouts for different screen sizes to support a consistent browsing experience across devices.

Food Delivery App UI/UX Design Personal Project
Figma

- Created high-fidelity UI/UX prototypes for a food delivery application, covering login, restaurant listings, cart, and checkout screens.
- Mapped interactive user flows to illustrate navigation between key screens and the food-ordering process.

EDUCATION

Bachelor of Engineering – Computer Science Engineering
Fatima Michael College of Engineering and Technology | CGPA: 7.5 / 10.0
